H & H Specialties has manufactured curtain tracks for entertainment and performing arts facilities for 40 years under the Atlas Silk® Trademark. During this time, users have come to expect their equipment to accommodate increased loads, operate smoother, perform more difficult tasks, and last longer. H & H Specialties has continually worked with architects, consultants, and users in designing products to meet these requirements.

The following pages illustrate our standard product line. Our products are stocked and sold by established dealers throughout the United States, Canada, and many other countries, providing local sources for the supply, installation and maintenance of our equipment. In addition, the factory's design and manufacturing capabilities are available to create custom modified equipment for special applications.

Inquiries regarding any product, or custom equipment designed to your specifications, can be addressed to individual dealers or directly to the factory.
